

How to Obtain Computer Name on a Mac

1. Open the **Apple menu** by clicking the  icon in the top left corner of display. Select **System Settings**

2. Click the **General** then **Sharing** icon.

3. The Sharing panel will open. The computer's name will be presented under **"Local hostname"** at the bottom of this panel. You may need to scroll to the bottom. In the example below, the computer's name is **"mac.local"**
