

2 Methods to Obtain a Windows Computer Name

Method 1: From “This PC” Icon

Locate the “This PC” (Formerly “My Computer”) either on your desktop or in file explorer

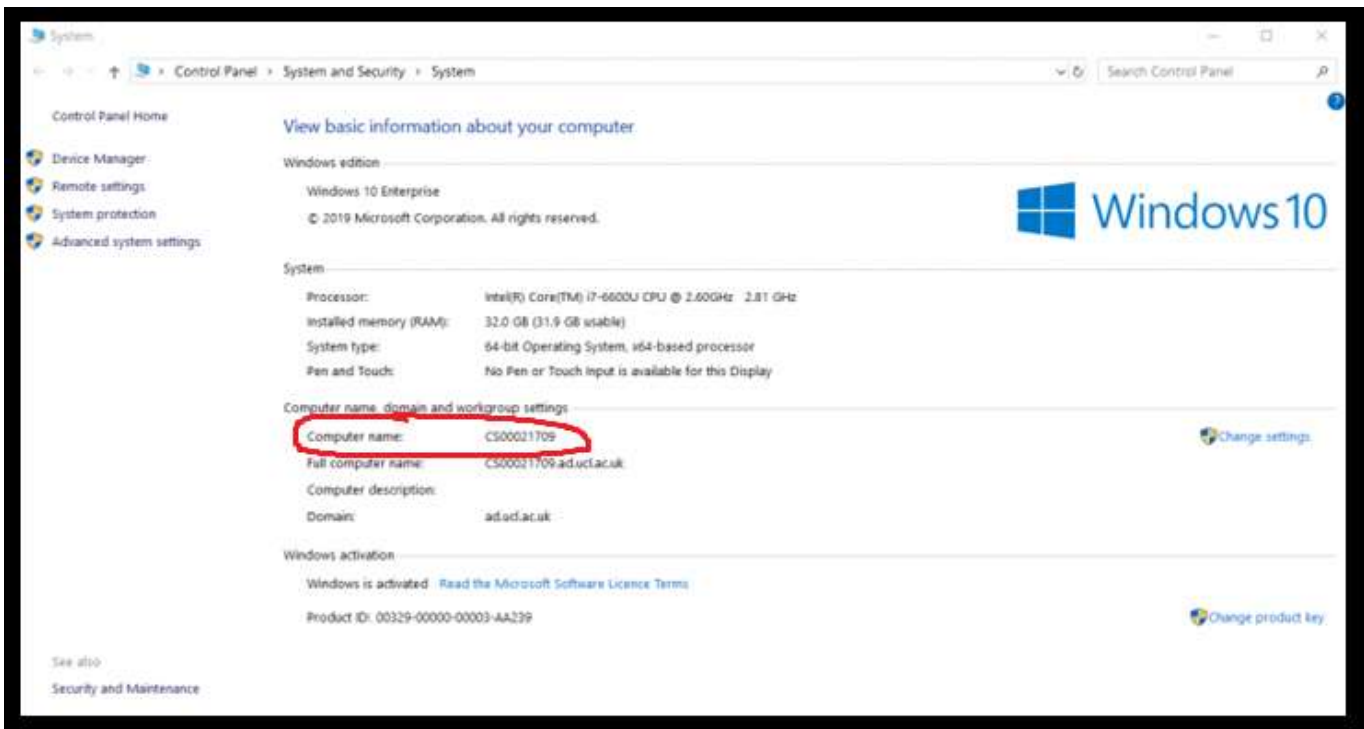

Right click on this icon and select “Properties”

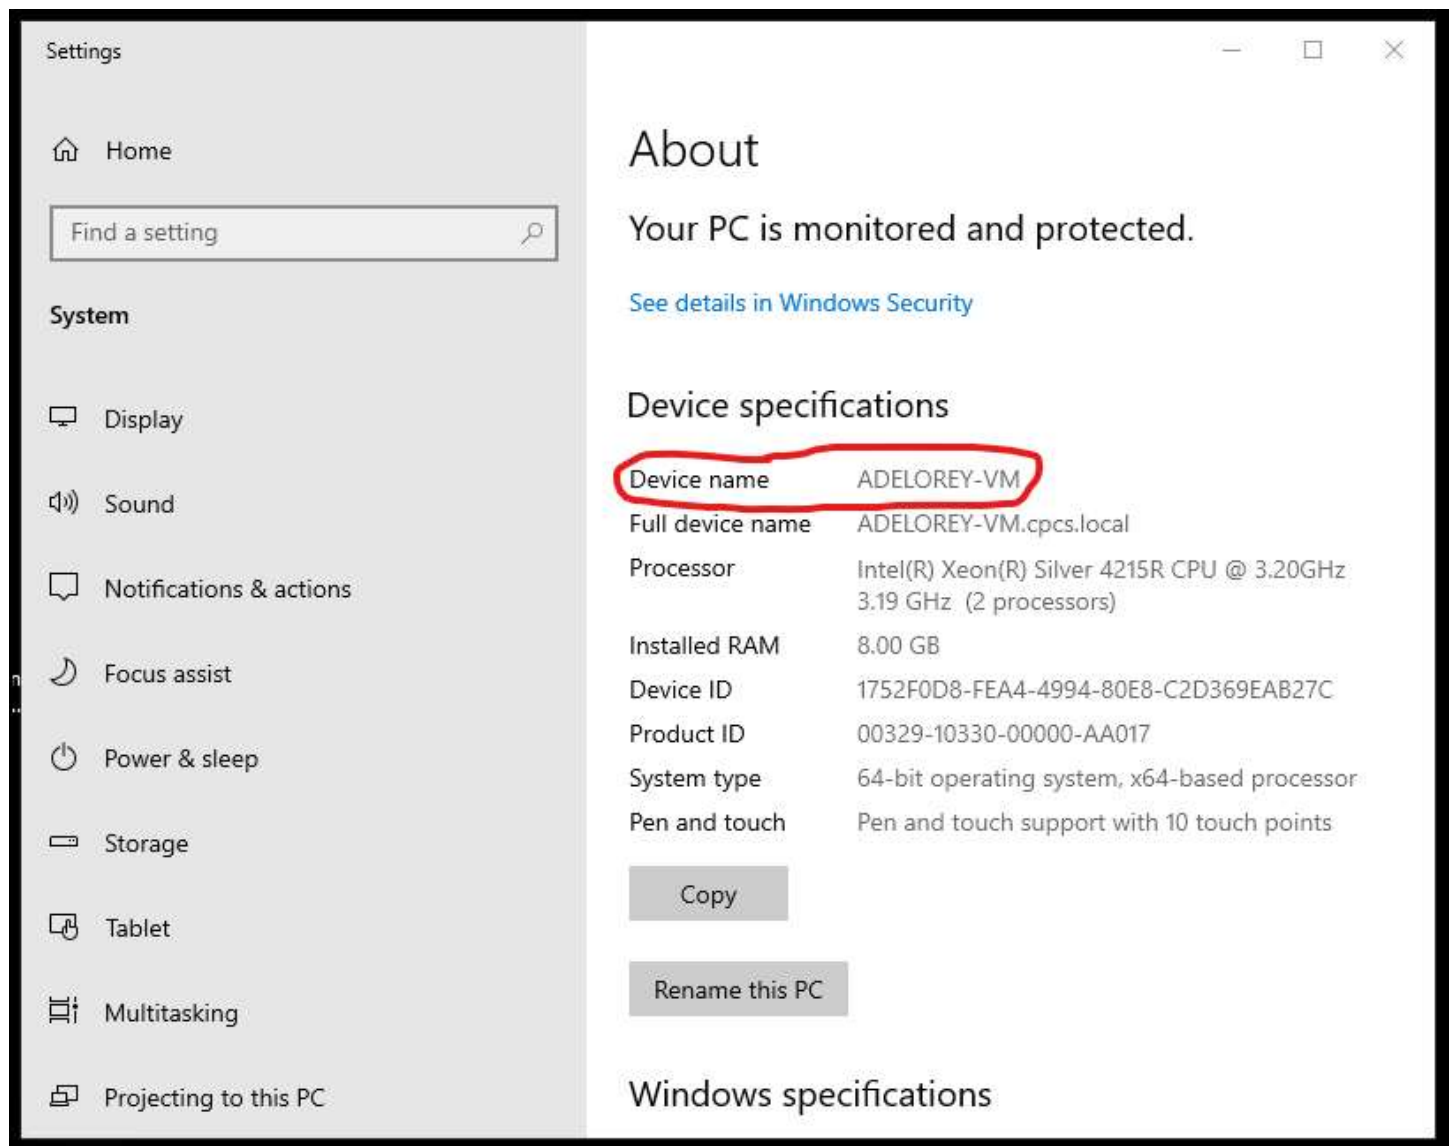

You will be presented with one of the two following windows below. Both will have your Computer Name listed.

Possible Window 1:

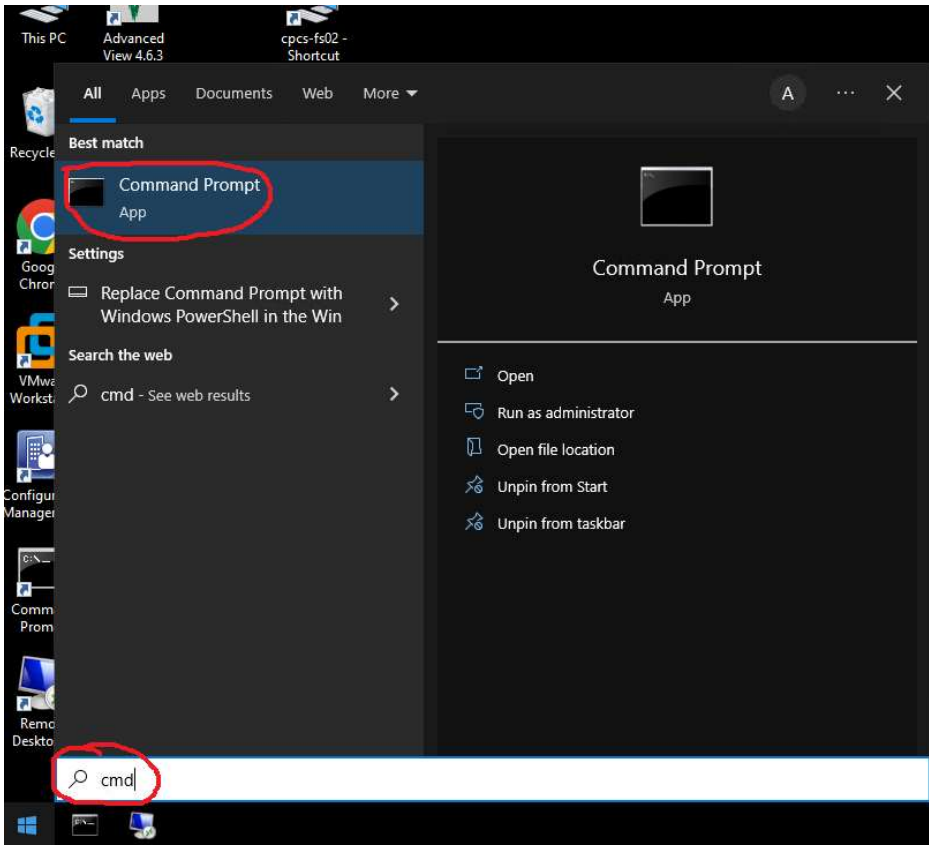

Possible Window 2:

Method 2: From Command Prompt

Click on the Start menu and type "CMD". Click on Command Prompt:

In the window that pops up, type in "hostname" and hit enter:

The computer's name will be returned.
